

# Green Product Design Competition

Prize: £500 cash

Design an innovative new household product with mass market appeal to be manufactured using Axion Polymers' 100% recycled plastics.

Be inspired by the material's environmental profile and let this show either in the design or the purpose of your product. Your idea can be something completely new or unique or can be an improvement to an existing product on the market.

Closing date: 31st January 2010
