

SITE WASTE MANAGEMENT PLANS

ARE YOU READY?

THINK AHEAD..

In order to combat illegal fly tipping of construction waste, the government is introducing mandatory site waste management plans for all projects over £300,000. Companies will be required to provide detailed plans on how they will manage their waste before work begins on site, including details of how the plan will be implemented. During the project, construction companies will be required to monitor and evaluate their site waste management plans and be able to provide detailed records.

Site waste management plans are mandatory by 6th April 2008. Failure to comply could result in fines or even criminal conviction.

We can help you by providing a 'no hassle', low cost, comprehensive solution to your site plans ensuring full compliance with all waste regulations.

We will write your site waste management plan for you and complete the whole process from the initial draft plan through to implementation and monitoring and evaluation.

WHY CHOOSE US?

Axion Recycling, a recycling consultancy based in Bramhall, Greater Manchester, has been involved in the DEFRA consultation on the implementation of site waste management plans for the construction industry. Axion has worked on several WRAP funded projects including the implementation of a scheme to increase recycling services to small and medium sized enterprises in the construction sector.

Axion also administers the PVC industry's recycling scheme, Recovynyl. Axion's waste management consultants have between them over 50 years experience in the waste management and construction sector.

OUR SERVICE

Axion can offer a low cost comprehensive, service including:

WRITING THE PLAN

Axion will draft your waste management plan, including:

- a waste audit
- identification of type and amount of waste
- selection of reliable and efficient waste management companies
- procurement of recycled materials

IMPLEMENTING THE PLAN

Axion will implement your plan, including:

- staff training
- monitoring waste activity
- providing a hotline advice service to find recycling outlets for different materials
- ensuring contractors on your site handle their waste responsibly
- updating the waste management plan according to statutory requirements.

MONITORING & EVALUATING THE PLAN

Axion will monitor and evaluate your plan, including:

- estimated cost savings
- lessons learned for future projects.

Any of the above elements can be provided separately.
